forward thinking solutions for the auto industry...

eF&I Complete

The most robust and powerful finance and insurance Sales Management System available for your dealership. This easy-to-use, browser-based web application provides your dealership with a complete front-end set of easy to use modules, including: Credit reporting, desking, F&I, menu selling, inventory management, sales reporting, 3rd party integration, electronic deal jacket, and electronic forms processing.

Product Information

Web-Based Technology

Utilizing the power and flexibility of your high-speed internet connection; if you have access to a web browser, you have access to your software application and data. No CD's to load and install. No need for special network cabling and hardware, or VPN setup and costs to share data among multiple site locations.

Credit Reporting

As an authorized reseller for all 3 major Credit Reporting Agencies, integrated credit reporting and report storage is available without leaving the application, at very competitive pricing levels. All of the common credit reporting scores and options are available, along with OFAC and Red Flags Rule options.

Easy to Use

Simple, robust deal desking screen to handle all of your sales and F&I requirements. Automatic DMV fee calculations, automated service contract rating capabilities, complete inventory management, and sales history reporting. Permissions based security and configuration to meet your dealership's needs.

Drivers License Scanner

An optional integrated drivers license scanner which can automatically populate your credit application data and also retain an image of the drivers license for identification purposes and verification.

eForms Electronic Document Processing

The eF&I Complete eForms electronic document processing allows for real-time viewing/printing of all of your F&I documents utilizing the power of the popular Adobe PDF technology. Document storage and retrieval keeps a historical record of the documents you've prepared for a customer. Electronic signature capabilities and electronic contracting bring new efficiencies to your F&I process.

Features and Benefits

- Browser-based for easy accessibility and setup, along with user configurable options and functionality
- Configurable by dealer group, dealership, or user
- Online, electronic deal jacket for quick access and historical record keeping
